Aleksandar Svetoslavov

Web Developer
Eindhoven, North Brabant, Netherlands

Summary

During my work, I've had the privilege of contributing to the project "Dialogue" developed by KPMG's and "Trefi", a cutting-edge fintech solution by Capital Tool Company. These experiences honed my skills in client communication, team collaboration, and full-stack web development.

I have strong technical skills in deploying microservices for big software projects. using Kubernetes and autoscaling to make sure everything runs smoothly, as well as developing DevOps pipelines focusing on security, performance and automated testing. I'm proficient at prototyping with tools like Figma and Sketch, and also building engaging web applications, covering both front-end and back-end development.
